

Acceptance Letter

Paper ID	Title	Author(s)
ICICT-092	An Integrated Mobile Platform for Expediting Blood Donation and Request Management	Ayush Srivastava, Shaurya Jain, Prapti Sharma, Shriyansh Srivastava, Thammali Gangadhar

Dear Author(s),

We are pleased to inform you that your paper has been accepted for presentation and publication at the 9th International Conference on Inventive Computation Technologies (ICICT 2026), to be held in Lalitpur, Nepal, during April 15–17, 2026. Your manuscript was reviewed by subject experts, and based on the reviewers' recommendations, it has been selected for inclusion in the conference proceedings. The accepted papers will be submitted for publication in IEEE Xplore, subject to IEEE compliance requirements. Authors are requested to complete the final submission and registration process within the prescribed deadlines.

Conference Publication Details:

ICICT ISBN: IEEE XPLORE COMPLIANT ISBN: 979-8-3315-6917-4

IEEE DVD ISBN: 979-8-3315-6916-7

IEEE Conference ID: #68280

We congratulate you on your acceptance and look forward to your participation in ICICT 2026.

Best Regards,

Dr. Subarna Shakya
Conference Chair
ICICT 2026

Review Comments

Review Comments: 1

1. Why does the presented geospatial matching mechanism rely on MongoDB instead of novel algorithmic design?
2. The literature review is descriptive; authors should critically compare the proposed system with state-of-the-art designs.
3. Authors should experimentally validate the performance metrics, such as system latency, notification delivery time, and scalability.
4. The restriction of one active request per seeker is heuristic, provide a justification for user behavior analysis.
5. Figures only present the workflow and dashboards, include the empirical performance analysis also.

Review Comments: 2

1. Keywords should be specific and describe the Article's content (or constitute the Article's essence). Please revise
2. The authors must explicitly state the research objectives and finding in the Abstract subsection. Please add it.
3. Introduction: This subsection is not exhaustive. Research gaps not only discuss what you have identified but, most notably: it is necessary to discuss the existence of gap analysis from previous studies or weaknesses in the research results of earlier studies. Thus, it shows the importance of the research being conducted in improving Review what already exists, as well as for the advancement of science or the progress of society. Please improve it.
4. Methodology is mentioned, but it lacks specifics on the case study or model parameter used.
5. You need to add Recommendations and future directions for this study. Intext are not sufficient from problem statement to results and discussion
6. The methodology presentation is weak. The authors must mention the research method used. Including a block diagram of the stages is better to show the research methodology process.
7. Include a separate result section with all the result screenshots and explanations. Proper alignment editing is required throughout the manuscript. Redraft the conclusion section into a single paragraph in around 250-300 words. Cite the source for the figure copied from online (Ex. Fig 1). Remove the reference generated using AI (For ex: 2, 9). All the figures should be numbered, captioned and cited in the article content (For ex: "As shown in fig 1, Figure 2 shows, etc."). The references listed at the end of the article are not cited within the text. Cite all the references.
